## PROFESSIONAL SUMMARY

Aspiring Python Full Stack Developer with practical experience in Flask, React.js, MySQL, REST APIs, and frontend technologies. Skilled in developing responsive web applications, backend integration, and database-driven systems. Passionate about problem-solving, clean UI design, and building scalable applications using modern development tools and frameworks.

## EDUCATION

**B.Tech in Electronics and Communication Engineering**  
Percentage: 74.47%

**NRI Institute of Technology | 2025**

## EXPERIENCE

**Codegnan IT Solutions, Hyderabad**

**Oct 2025 – Feb 2026**

*Python Full Stack Trainee*

- Gained hands-on experience in Python Full Stack Development using Flask, MySQL, JavaScript, and React.js.
- Developed responsive full-stack web applications with backend–frontend integration.
- Worked on REST APIs, authentication systems, and database operations in real-time projects.
- Collaborated in development activities to improve problem-solving and debugging skills.

## TECHNICAL SKILLS

**Languages:** Python, JavaScript, SQL

**Backend:** Flask, REST APIs

**Tools:** Git, GitHub, VS Code

**Frontend:** HTML5, CSS3, Bootstrap, Node.js

**Database:** MySQL, SQLite3

**Concepts:** OOP, DBMS, Problem Solving

## PROJECTS

**E-Commerce Web Application**

[Deploy Link](#)

*Python, Flask, SQLite3, HTML, CSS, JavaScript, Jinja2, RazorPay API*

- Developed a full-stack e-commerce platform with product browsing, cart management, and seamless order placement functionality.
- Integrated Razorpay payment gateway to enable secure online transactions and smooth checkout experience.
- Implemented user authentication, session management, and role-based access for secure and personalized user interactions.
- Designed and optimized MySQL database while managing complete order lifecycle, including checkout, payment processing, and order tracking with responsive frontend UI.

**ATM Management System using Flask**

[Deploy Link](#)

*Python, Flask, HTML, CSS, MySQL*

- Developed a secure ATM simulation system to simplify banking operations like balance enquiry, withdrawal, and deposit management.
- Implemented authentication and transaction handling using Flask and MySQL to ensure secure user access and reliable data storage.
- Designed responsive frontend pages for smooth user interaction and easy navigation.
- Improved backend–frontend integration by managing transaction history and real-time account updates efficiently.

**Automated ECG Heart Disease Prediction System**

[GitHub](#)

*Python, TensorFlow, CNN, RNN, Pandas, NumPy*

- Developed a machine learning and deep learning based system to predict cardiovascular diseases using ECG signal data.
- Implemented CNN and RNN models with preprocessing and feature extraction techniques to improve prediction performance.
- Trained and evaluated models on ECG datasets to analyze heart disease patterns and compare algorithm efficiency.
- Achieved high prediction accuracy through model tuning, performance evaluation, and optimized data processing techniques.

## CERTIFICATIONS

- Wipro TalentNext – Java Full Stack
- HackerRank – Python (Basic)

## ACHIEVEMENTS & ACTIVITIES

- Secured Participation Certificate in Puzzle Tracking during National Level Technical Fest “SUNRISE-2K22” conducted at NRI Institute of Technology.
- Participated in “The Young Indians Future 3.0” and Technical Quiz conducted by IETE at NRI Institute of Technology.
- Successfully completed “Junior Software Developer” qualification assessment of 450 hours and earned 15 credits with A Grade.
